DETAILED ACTION

1. Claims 1-4, 6-8, and 15-19 are pending for examination as interpreted by the examiner. The amendment filed on 4/18/07 was considered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The amendment was approved by the applicant's representative, Juan Carlos Marquez, on 6/11/07.

The application has been amended as follows: "first optical irradiating means for irradiating a first optical spot with a wavelength sufficient for recording on said recording medium onto said first layer; and" was amended to read --"first optical irradiating means for irradiating a first optical spot with a wavelength sufficient for recording on said recording medium onto said first layer to speed up one of a coloring operation and a de-coloring operation of said second layer; and-- in lines 8-10 of page 6.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: claims 1-4, 6-8, and 15-19 are allowed over the prior art because of the references cited in the record, considered in combination or alone, fail to suggest or fairly teach first optical irradiating means that irradiate said first optical spot onto said first layer to speed up one of a coloring operation and de-coloring operation of said second layer. Column 3, lines 33-36 of Green explain that the electrically conducting coating is made of indium tin oxide, which is an example of the polythiophene-derivative organic material that is used to speed up the process as given in paragraph 0044 of the application. However, Green does not disclose the given stacks of layers where the speeding up one of a coloring operation and de-coloring operation is done on separate stacks of layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent Publication 2005/0084660 discloses similar material; but has a common inventor. US Patent Publication 2007/0109218 also discloses similar material.
